

Trace

Compact LED task light

A compact LED task light with a great personality

Trace is a compact LED task light, with excellent light output and minimalistic design. A slim arm carries a distinct softened square lamp head. The task light changes shape and expression when seen from different angles.

Despite its modest size, Trace has a definite presence and posture that makes it suitable for a wide variety of office environments. The combination of simple lines and an elegantly shaped lamp head gives it a distinct personality.

Excellent ergonomomy

Trace offers excellent ergonomomy in the office workspace. The light output is asymmetric, distributing the light evenly at an angle across the working area. This minimizes reflection, and allows the Trace to be placed well to the side of the workspace. The flexibility of the arm and lamp head provide added flexibility so the user can easily place the light exactly where it is needed.

Design: Oskar Daniel and Emil Marklund

Noted Swedish designers Oskar Daniel and Emil Marklund are known for their collaboration on a wide variety of projects. Now they have come together to create Trace for Luxo. The result is a task light which combines compact size and distinct personality with excellent light output.

USB charger version

A version of Trace features USB charging. The USB charger is seamlessly integrated into the base for ease of use and access.

Dimming and auto shut-off

Trace is equipped with a dimmable 6 Watt LED module. The on/off switch, which also functions as a dimmer, is positioned prominently at the top of the lamp head. This attractive combination of aesthetics and functionality not only adds to the design of the product, but also allows the lamp to be easily operated with only one hand.

Trace also features automatic shut-off which turns the light off after 4 or 9 hours for added energy savings.

Décor rings in rich colors

The lamp head may be complemented with a décor ring, available in a spectrum of rich colors including:

- Sweet fuchsia
- Aqua marine
- Street light orange

The addition of a colorful décor ring gives the task light a playful expression. It also means that the personality of the luminaire may be altered by switching between differently colored décor rings. Custom colors are available upon request.
